

# moore reasons to go to Trondheim

"Imagination and fantasy are just as important as knowledge"

Welcome to one of Europe's largest independent research environments. History permeates the old, but modern city of knowledge and expertise: Trondheim with its internationally recognized institutions for education and strong centres in technology, marine technology and medical research

Social competition as a pecking order by T Schjelderup-Ebbe, is Norway's most cited scientific textbook all over the world. The pecking order is related to human behaviour and explains the formation of hierarchy between individuals in a competitive environment. The contrast to this is the scientific approach to soccer by the manager of Trondheim's highly successful football team, Rosenborg, Nils Arne Eggen and his "Goodfoot theory." He emphasises the importance for all of us focusing on people around us, not as rivals, but as resources for growth and success on a daily basis. The club made history with their qualification in the European Champions League 7 years in a row...

Building bridges between research and the public is also of great importance. Issues like love, intimacy and emotions contrasted with the focus on technological research

Welcome to a country where you have the legal right to enjoy nature

The history of Trondheim is dramatic - as is its scenery. The contrasts are impressive. Even in the city of Trondheim you are only a 10-minute trip from the forest with footpaths, ancient trees, wild life and hills, as well as beautiful views over the city and the fjord. Getting there is easy. The city's only tram line runs from St Olav street in the city centre to Lian in Bymarka. The 110 km<sup>2</sup> greenbelt in Trondheim is a good starting point for this walks or horseback riding in the mountain terrain

Norway offers some of the best salmon rivers in the world. Six of the top ten rivers in Norway are located in central Norway. In addition, there are plenty of opportunities for angling.
